

Introduction

If due to maintenance works or any other reason the upper part of the existing safety barrier is low and needs to be lifted, we have various models of lift-out posts which can be installed on IPN profile, C profiles or tubular posts. They can be manufactured in any length and are supplied hot-dip galvanized.

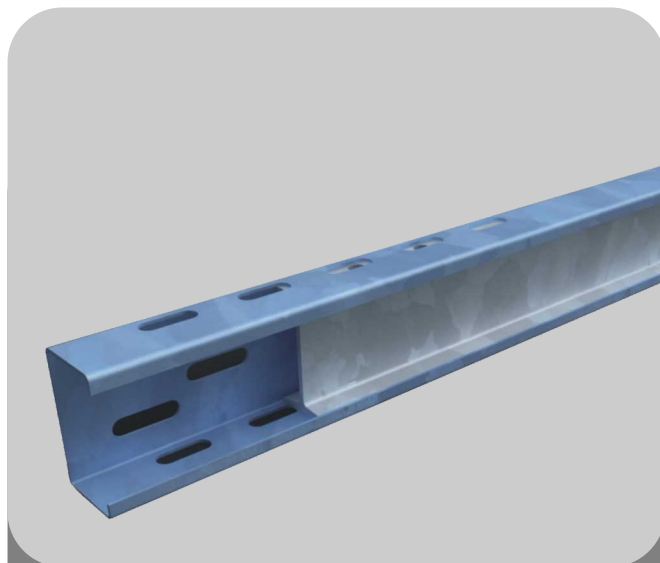

Models

Lift-out post for C profile barrier for C posts

Technical Characteristics
for C-100 and C-120 posts
Thickness: 3 mm

Lift-out posts for C profile barrier for IPN posts

Technical Characteristics
